Check your NYC qualifying result

Use the calculator to compare the time, but start with the event route. It is the easiest place to make an expensive planning mistake.

Worked example

> A time calculator can compare elapsed time with a standard. It cannot verify course eligibility, documentation, application deadlines or selection.

Your turn

1. Record the target edition and official standard for your age and division.
2. Check the qualifying event and window against the correct NYRR or non-NYRR route.
3. Keep time eligibility separate from selection and application deadlines.

What I observed / what I will check next

2027 context. Speed alone does not establish entry. Educational worksheet, not an individualized training prescription.

Method / rules: NYRR time-qualifier rules.
